

MULLER SEMI-AUTOMATIC STRETCH WRAPPERS

RAPTOR 525 TURNTABLE

- Wraps up to 35 loads per hour
- 4,000 lb. capacity
- Lift truck portable from front and rear
- Heavy duty construction
- Pre-stretches film up to 300 %
- Positive non-slip chain drive
- PLC control
- Octo-Thread carriage allows easy film threading
- Strain gauge film delivery control

COBRA 525 ROTARY ARM

- Wraps up to 35 loads per hour
- No weight limits - loads are wrapped on the floor
- Freestanding or column mounted designs
- Heavy duty construction
- Pre-stretches film up to 300 %
- Positive non-slip v-belt rotation drive
- PLC control
- Octo-Thread carriage allows easy film threading
- Strain gauge film delivery control

OCTO-THREAD CARRIAGE

Simplified film threading with improved operator ergonomics

The Octo-Thread patented electronic film feed tension sensing system eliminates the need for a moving dancer bar assembly. This design has proven itself to be very reliable, reducing maintenance costs, and valuable downtime. At the same time, this zero inertia fixed-mount roller provides a faster response to load irregularities, automatically adjusting the film delivery speed to keep a constant film force-to-load regardless of load position, size, or shape reducing the chance of broken film.

Advance also offers rentals, leases and 24 hr service on stretch equipment
